

Blake C. Stacey
Curriculum Vitae
15 December 2021

Personal:

Work address: Physics Department
University of Massachusetts Boston
100 Morrissey Boulevard
Boston, MA 02125
E-mail: [bstacey at alum.remove-this.mit.and-also-this.edu](mailto:bstacey@alum.remove-this.mit.and-also-this.edu)
Website: www.sunclipse.org

Education:

B. S. in Physics, Massachusetts Institute of Technology, June 2005.
M. S. in Physics, Brandeis University, February 2014.
PhD in Physics, Brandeis University, August 2015.

Research Interests:

Statistical physics of nonequilibrium systems, universality and renormalization, information theory, quantum probability, evolutionary ecology.

Funding History:

- Project Leader (with co-leader C. A. Fuchs), “Geometric Phases and Symmetric Quantum Measurements,” contract for John Templeton Foundation, 1 July 2018 – 30 June 2020. Total funding: 211,370 USD.
- Principal Investigator (with co-PI C. A. Fuchs), “Why the Quantum? A Video Series,” contract for Foundational Questions Institute (FQXi), 1 December 2016 – 31 December 2017. Total funding: 4,500 USD.

Publications:

- P. Antonioli, R. T. Fienberg, F. Fleurot, Y. Fukuda, W. Fulgione, A. Habig, J. Heise, A. B. McDonald, C. Mills, T. Namba, L. J. Robinson, K. Scholberg, M. Schwendener, R. W. Sinnott, B. C. Stacey, Y. Suzuki, R. Tafirout, C. Vigorito, B. Viren, C. Virtue and A. Zichichi, “SNEWS: the Supernova Early Warning System,” *New Journal of Physics* **6** (2004): 114. [arXiv:astro-ph/0406214](https://arxiv.org/abs/astro-ph/0406214).
- B. C. Stacey, “[Relation of Electron Scattering Cross Sections to Drift Measurements in Noble Gases](#).” Senior thesis under the supervision of Prof. U. Becker, MIT (2005).
- B. C. Stacey and Y. Bar-Yam, “Principles of Security: Human, Cyber, and Biological.” Report for the Chief of Naval Operations Strategic Studies Group (SSG). [arXiv:1303.2682](https://arxiv.org/abs/1303.2682) [[cs.CR](#)] (2008).

Teaching:

In the spring 2020 term, I taught the graduate statistical physics course (PHYS 614) for the University of Massachusetts Boston.

From 2007 through 2017, I taught at the New England Complex Systems Institute’s [winter and summer schools](#) on complex-systems science, hosted at MIT. My responsibilities included lecturing, supervising students’ group work projects and facilitating the programming lab that introduced scientific computing with Python. My standard course of lectures included the following:

- “Introduction to Complex Networks”
- “Genetic Algorithms: Solving Problems with Applied Evolution”
- “Nonlinear Dynamics and Chaos”
- “Random Processes, Probability and Information”

At Brandeis University, I graded and wrote solution sets for quantum physics, advanced classical mechanics, thermodynamics and electromagnetism, as well as regularly staffing the homework-help office that provided assistance to undergraduates.

Talks:

- “On Reconstructing Quantum Theory,” [Scholar.Social Summer School](#), 29 July 2020.
- “From Quantum to Qplex and Back,” Quantum Chaos and Quantum Information seminar, Jagiellonian University, 15 June 2020.
- “Symmetric Informationally Complete Measurements Pinpoint the Essential Difference between Classical and Quantum Probability Theories,” APS March Meeting, 7 March 2019.
- “Two Departures from Classical Information Theory,” Brandeis IGERT Summer Institute, 27 June 2018.
- “Symmetric Informationally Complete quantum measurements,” CMS seminar, Tufts University, 4 April 2018.
- “Symmetric Informationally Complete measurements: Where quantum information meets sphere packing,” [American Mathematical Society sectional meeting](#), Ohio State University, 17 March 2018.
- “A Quantum-Informational Introduction to SICs,” opening talk of the “Seeking SICs” workshop, MIT Center for Theoretical Physics, November 2016.
- “Probability, Information Theory and Multiscale Structure in Complex Systems,” three lectures at the Brandeis IGERT Summer Institute, July 2015.
- “Mesoscopic Structure in Complex Networks,” Brandeis IGERT Summer Institute, August 2013.
- “Community Formation in Nonequilibrium Spatial Ecosystems,” IGERT seminar at Brandeis University, 19 September 2012.
- “Beyond the Mean Field in Spatial Evolutionary Ecology,” in the Adaptive Networks session of ICCS 2011.
- “Motif Statistics in Protein Geometric Networks,” ICCS 2006.
- “Relation of Electron Scattering Cross Sections to Drift Measurements in Noble Gases,” APS/AAPT joint session, May 2005.

Professional Community Engagement:

Academic journals for which I have written peer reviews include *Annalen der Physik*, *Complexity*, *EPL (Europhysics Letters)*, the *Journal of Genetics*, *NPJ Quantum Information*, *Physical Review A* and *Physical Review E*. I have refereed textbook proposals for the university presses of both Oxford and Cambridge.

I organized the “Seeking SICs” workshop at the MIT Center for Theoretical Physics, held on 15 November 2016.

With A. Khrennikov, I co-edited the [Quantum Foundations: Informational Perspective](#) special issue of *Foundations of Physics* (2017).

I have been thanked in the acknowledgements sections of the following publications, among others.

- B. Zwiebach, *A First Course in String Theory*. (Cambridge University Press, first edition 2004, second edition 2009.)
- T. Tao, [Structure and Randomness: pages from year one of a mathematical blog](#). (American Mathematical Society, 2008.)
- T. Tao, [An Epsilon of Room, I: Real Analysis](#). Graduate Studies in Mathematics, volume 117. (American Mathematical Society, 2010.)
- J. C. Baez, “Rényi Entropy and Free Energy,” [arXiv:1102.2098 \[quant-ph\]](#) (2011).
